SUMMARY

Senior Software Engineer with 5 years of experience building scalable mobile and full-stack applications. Shipped apps with 1M+ downloads, supported 10,000+ concurrent users, and maintained 99.8% uptime across consumer and fintech platforms. Strong across the full stack - React Native, TypeScript, Node.js, Python, AWS - with hands-on experience in AR/MR and blockchain integrations. Mentored junior engineers, led architecture decisions, and owned products end-to-end from build through production release. Recently completed an MSc in Managing Innovation and IT at the University of Salford.

SKILLS

Mobile: React Native, ReactJS, TypeScript, Redux, Context API, Reanimated, FlashList, React Hook Form, Responsive UI, Accessibility (WCAG 2.1)

Backend: Node.js, Python, Django, REST APIs, GraphQL (Apollo), MongoDB, Firebase, AWS, Java, SpringBoot, Offline-first Architecture

Testing and DevOps: Jest, React Testing Library, TDD (80%+ coverage), CI/CD Pipelines, Fastlane, GitHub Actions, Firebase Crashlytics, Git

Emerging Tech: Google ARCore, Augmented Reality (AR), Mixed Reality (MR), Blockchain Integration, Real-time GPS, and Bluetooth Proximity Detection

Tools: Xcode, Android Studio, Agile, Scrum, Jira

EXPERIENCE

GYSBOX TEAMWORKS - Hyderabad, India

Senior React Native Engineer

Jun 2022 - Aug 2024

- Owned mobile development for a fintech POS platform - built scalable transaction workflows, retry logic, and state sync from scratch
- Supported 10,000+ concurrent users with 99.8% uptime; performance optimisation was a core requirement throughout
- Cut API response times by 25% by reworking Node.js and MongoDB queries and introducing caching patterns
- Reduced production defects by 25% through TDD with 80%+ test coverage across the codebase
- Shipped offline support and push notifications via Firebase - user retention increased by 15% post-release
- Managed iOS and Android releases through Fastlane and GitHub Actions CI/CD pipelines

React Native Developer

Sep 2021 - Jun 2022

- Worked on Tropical Smoothie Cafe - 1M+ download food ordering app used daily by customers across the US
- Built the full ordering flow, menu customisation, and Tropic Rewards loyalty system integrated with live backend services
- Added offline order support - order success rate improved by 10%
- Built loading and transition animations with Reanimated and Lottie, improving app responsiveness by 20%

Full Stack Engineer

Jan 2020 - Sep 2021

- Led development of Coral - a scalable community management platform consolidating Slack, WhatsApp, Telegram, and Discord into one dashboard
- Built and owned the full stack: React frontend, React Native mobile app, Java SpringBoot backend, AWS, and Firebase infrastructure
- Took Coral from zero to live on the Google Play Store, managing deployment and real-time infrastructure
- Implemented Bluetooth and GPS proximity detection, cutting user connection time by 40% and boosting engagement by 25% after blockchain feature launch

Kanaxis Software Solutions Pvt Ltd - Hyderabad, India

Full Stack Engineer

Jul 2019 - Jan 2020

- Built SOMA - a full-stack e-commerce platform for a European luxury watch brand using React and Java SpringBoot
- Built EduYep - a secure, privacy-first social platform for students with a React Native mobile app, AWS hosting, and Firebase real-time sync
- Improved API response times by 20% through MongoDB query optimisation and backend refactoring

KEY PROJECTS

Fintech POS and Payments Platform

- Built mobile transaction workflows for high-frequency POS environments with secure API integrations and retry handling
 - Supported 10,000+ concurrent sessions with real-time state synchronisation and no performance degradation
- Stack:** React Native, TypeScript, Node.js, Redux, REST APIs

Tiluf - AR Social Networking App

- Built real-time AR overlays displaying nearby users names and interests in physical space using Google ARCore
 - Bluetooth and GPS proximity detection reduced connection time by 40% and increased engagement by 25% after blockchain integration
- Stack:** React Native, Google ARCore, Python, Firebase, Blockchain

Coral - Community Management Platform

- Scalable dashboard consolidating Slack, WhatsApp, Discord, and Telegram for large community administrators
 - Built a real-time notification system, deployed on AWS with Firebase database, shipped to Google Play Store
- Stack:** React, React Native, Java, SpringBoot, AWS, Firebase

Tropical Smoothie Cafe - 1M+ Downloads

- Ordering, loyalty rewards, and offline support on one of the most-downloaded food ordering apps in the US
 - Custom animations via Reanimated and Lottie improved perceived app responsiveness by 20%
- Stack:** React Native, Firebase, Reanimated, Lottie, REST APIs

EDUCATION

MSc - Managing Innovation and Information Technology

2024 - 2025

University of Salford, Manchester, UK

B.Tech - Computer Science and Engineering

2015 - 2019

Vignan University, India
